** Based on a home with a heat demand (space heating plus hot water) of 21,500kWh per year. The RHI Tariff rate payable by the Government is 12.2p per kWh generated. This delivers a calculation of $21,500 \times £0.122 = £2,623$ RHI payment per year. And this will continue for 7 years, giving the consumer £18,361 in total.*

Inside Flap

Without doubt, Biomass is a fantastic opportunity for householders

It has so many incredible benefits. Here are just a few:

Total control over your energy costs

A stunning cost saving over other fuel options

An additional tax-free income of up to £50 per week for 7 years

Very little waste

Easy to use, simple to run

Boilers are available in a range of sizes and colours to suit all needs.

Installation is simple and straightforward.

The controls are easy to understand

Headline across the 3-page spread

Why pay 3 times more for your energy costs, when you don't have to?

Inside Left

What Is Biomass?

Biomass is a sustainable fuel that offers consumers like you, a massive range of attractive benefits. It's an alternative fuel solution, provided through renewable, low carbon wood-based pellets.

When you install a Biomass boiler, you will be **saving huge amounts** on your energy costs. You will be paid by OFGEM for the heat and hot water you produce, with approved equipment. **The payment of up to £18,361*** provides a guaranteed index-linked income for 7 years.

Over the last 18 months, fuel prices have seen a 34% increase. And fuel costs have doubled in less than ten years. OFGEM are forecasting a 6-fold increase over the next 10 years.

These ever-increasing fuel costs are a great concern to us all. So, it is little surprise, that more and more consumers are urgently reviewing their options - and many of them are turning to Biomass.

Inside Centre

The Government's domestic RHI scheme

This Government scheme handsomely rewards householders that generate and use renewable energy to heat their homes. This scheme has been originated to encourage the use of renewable energy sources instead of fossil fuels. This helps the UK reduce greenhouse gas emissions and meet its targets for reducing the effects of climate change.

The RHI is paid on each kWh of heat generated by your biomass boiler or stove.

Here's an example of the rewards that a typical consumer property could enjoy with RHI. It's based on a home with a heat demand (space heating plus hot water) of 21,500kWh per year.

The RHI Tariff rate payable by the Government, is 12.2p per kWh generated.

This delivers a calculation of $21,500 \times £0.122 = £2,623$ RHI payment per year

And this will continue for 7 years, earning the consumer £18,361 in total.

Why Chose Solarlec Renewable Solutions?

Solarlec are the market leader in renewable energy solutions. And here's why...

- One of the country's leading renewable systems providers
 - Government approved
 - Renewable Energy Assurance Listed code of conduct
 - MCS accredited
 - Award-winning company
 - We guarantee all of our work and install to the highest possible standards
 - An installation will be speedy and professional
 - Solarlec can carry out an annual service
 - Boiler comes with a 3-year manufacturer's warranty
-
- **Order now and your system can be installed within 8-12 weeks**
