December 2015

**Time is running out, so don't delay or you will lose out!**

Dear Mr Sample

## This is your last chance to SAVE UP TO 50% OFF your electricity bills, as the Government plan to reduce the current subsidies by 87% in early 2016

If you have been considering solar panels for your home recently, but have yet to make up your mind, then there is something you should know...

The Government Feed-In Tariff scheme, which can **save consumers upwards of £905 per year and 25-year benefits of over £28,000**, has been too successful. So, they are planning to massively slash the subsidies paid to homeowners with solar panels - by 87% in early 2016.

So far, **the Government has paid out more than £2.6 billion** to UK consumers and businesses, since the start of the scheme in 2010. It has been a spectacular success. But now, given their current frugal approach, they are going to reduce these payments.

### You will miss out on nearly £10,000 in subsidies, if you don't act now...

Even though the Government are cutting the subsidy, you still have a chance to enjoy the tremendous current rates for the next 25 years, if you make the decision to fit solar panels to your home, before midnight on January 16th 2016.

**You could save yourself nearly £10,000 in subsidies.** That's an awful lot of money...

Let's face it, energy costs continue to rise and there is no sign of the increases slowing down.

The way they are going, energy bills could be unaffordable in less than 3 years.

As an average homeowner, you are likely to be paying over £1,500 a year for your energy.

By installing the very latest solar panels at your home, **you could cut your total energy costs to only £49.58\* per month - and save £905 per year!**

**That's a £28,144 saving to you and your family in the next 25 years...**

### Take advantage of our £250 discount voucher and our Easy Payment Plan

We don't want you to miss out on this fantastic opportunity.

So, we are offering you the very latest Solar Panel System for your home, with **£250 discount**, if you order before midnight on 16th January 2016. And, an Easy Payment Plan is available, to make it so much more affordable for you.

This gives you greater benefits, as you could be enjoying the massive savings on your

(please read on)

*"We wanted to thank the team at Solarlec that were engaged to supply and fix our solar panels at St Dennis in Cornwall.*

*From the start of the quotation through to the delivery of the concluding documentation, everything was first class.*

*The information given within our quotation was detailed and proved to be accurate. This detailed information left us with no concerns that we weren't making the right decision.*

*We would not hesitate to recommend Solarlec if we were approached by anyone thinking of having solar panels fitted."*

Barry Swift, Cornwall

*"Thank you for a good professional service, the men who installed it were friendly and courteous and installation was quick and easy with no mess and no disruption.*

*Thanks also to Rob Hankers who explained everything to us and was very helpful."*

Mr & Mrs Dean, St Ives

electricity, before you make any payment on your Payment Plan. It's an incredible offer.

### Solar Panels make so much sense - they put you in control of your electricity costs for the next 25 years.

And what's more, they will provide a nice income for you.

When you invest in solar panels, it's good news all the way. Just look at some of the amazing benefits you and your family will enjoy:

- ✓ Save thousands of pounds on your household energy bills
- ✓ Generate all the electricity you need, plus earn a nice income as well
- ✓ Your total energy costs will come down to as little as £49.58\* per month
- ✓ Benefits last for at least the next 25 years.
- ✓ Future electricity price rises will not affect you
- ✓ Our superb new panels are 20% more efficient than the old ones

**We'll give you £250 towards the cost of your top-of-the-range panels – but you have to act before midnight on January 16th.**

I know I'm repeating myself, but I have to stress that **the Government are going to slash the rates of the FIT scheme in only a few week's time.** Once they change the tariffs, anyone looking at installing solar panels after that, will get 87% less benefit from the scheme, than those who signed up before that date.

So, please don't wait a moment longer. An 87% difference could mean you and your family could lose over £10,000. Can you afford that?

And don't forget, we are offering you the very latest Solar Panel System for your home, with **£250 discount**, if you order before 16th January 2015. What's more, the Easy Payment Plan is available to make it even more attractive for you.

Please don't delay a moment longer. Call us today and speak to one of our friendly solar panel advisors on **0800 022 4083** or **01282 839105**. They are waiting to take your call and will be able to answer any questions you may have - and set up a **FREE, initial no-obligation survey at your home.**

We look forward to hearing from you.

With very best wishes

James Glen  
Customer Services Manager

**P.S. Don't forget, the Government are going to slash the rates of the FIT scheme by 87% in only a few weeks' time. So contact us TODAY for your FREE home survey, to make sure you don't miss out. And remember, with our £250 discount voucher - and our Easy Payment Plan - there has never been a better time to invest in solar panels.**

\*Cover all your household energy costs, for as little as £49.58 per month. Recent figures show that the total energy bills of a normal house, average out at around £1,500 per year. Taking the example of a 4.00kW, 16-panel Solar System, you could benefit by over £75.42 per month, as the Solar Panel System Benefit table shows. That is £905 per year. So, all it will cost you to provide the total energy requirements of your house for a whole year, will be £1,500 less £905 - £595 per year. Which is the incredibly low amount of £49.58 per month.

*"I just thought I'd let you know how pleased we are with the solar panels.*

*It's been a full year since the solar panels were put in and I have just checked everything and we paid nothing for our electricity last year with the panels!*

*In fact we got back in FIT payments, £23 more than we spent on electricity. So actually we have earned a great rate of interest on what we paid for the panels as the bill would normally have been about £800 per year for electric.*

*Just wanted to let you know and to say thanks again. I shall mention my great savings to my friends and see if I can tempt them now - they didn't seem convinced a year ago but these figures might make a difference!"*

Jan Wilde,  
Hullavington

## The benefits are enormous...

- ✓ Reduce your net monthly to only £49.58\* per month
- ✓ Make your own electricity for 25 years
- ✓ 8% to 12% annual return
